Experience

Senior Web Developer Move.Inc (<http://www.move.com>)

Jan 2011 – Current

Move, Inc., is the leader in online real estate and operator of the Move Network of real estate web site for consumers and real estate professionals. The Move Network of websites captures more than 15 million monthly visitors.

I am involved in the development of a new project to deliver statistical reports to over 600,000 clients on a regular basis. In order to deliver large amount of statistical data to our huge client base, our system need to be robust and efficient in both development time and performance. Some of the technologies we've use include .NET MVC 3.0, .NET 4.0, Reflection, Entity Framework, Log4Net, LINQ, Moq, JQuery and MSSQL.

Web Developer GoodNews.com (<http://www.goodnews.com>)

Apr 2010 – Nov 2010

GoodNews.com is a new project / sub company of Reinvent Technology. The company's main service is to provide amazing daily deals that help customers save from 50% - 90% in local products / services, to promote local businesses and to also help raise money for local causes.

Responsibilities

- Website implementation using PHP, CSS, Kohana, Postgres and JQuery
- Integrations of various promotional media to attract users to sign up
- Implement statistical reporting tools to show daily growth in users and revenues
- Aid in load testing / performance testing / stress testing to enhance website stability
- Aid in Content Delivery Network (CDN) and Amazon Web Services (AWS) setup to improve efficiency and avoid website going down due to high user accesses.

Sample sites

Interest and Hobbies

Other than programming and learning about various technologies, I enjoy sports, video games and movies. I also recently became the director for a soccer club that's been around in the Vancouver community for over 8 years.
